INTRODUCTION

I'm looking for a position to learn and apply my skills as I grow with an organization. With my experience employed at Storenvy and The Firehose Project bootcamp, I've acquired a broad understanding of Ruby, Rails, Javascript, HTML, and CSS, with the ability to create complex web applications. I've spent time building, debugging, and maintaining live web applications. I've learned many skills that will help me thrive in a group environment using tools like Git/Github to commit, test, and review code with others. I've spent extensive time learning from classic and modern self development books, as well as many books in the programming field.

SKILLS

Languages: Ruby, HTML, CSS, JavaScript
Frameworks: Ruby on Rails, Bootstrap
Concepts: TDD, Agile
Tools: Git/Github, Jira, Slack, CircleCi, Bugsnag

PROJECTS

flixter-brandon-goodman.herokuapp.com/
A two sided video streaming marketplace platform, featuring credit card payment capabilities, user role management, complex user interfaces and advanced database relationships.

nomster-brandon-goodman.herokuapp.com/
A Yelp clone that integrates with Google Maps API and includes features like user comments, star ratings, image uploading, and user authentication.

grammable-brandon-goodman.herokuapp.com/
An Instagram clone built with automated software test using a Test-driven development approach.

todo-brandon-goodman.herokuapp.com/
A To Do list app built with a fluid user interface through JavaScript.

splurty-brandon-goodman.herokuapp.com/
A database-powered quote generator with a mobile first design, using Ruby on Rails, HTML, and CSS.

EXPERIENCE

Junior Software Engineer, Storenvy at MoreCommerce; Nashville, TN
Nov, 2018 - July, 2019
As part of a small team at a large eCommerce platform my responsibilities were numerous. Fixing bugs, building new features, writing Jira tickets, running the social media accounts, and even creating DOMO reports. Within my first 6 months I built a social media blast request system using Rails, HTML, CSS, and JS/JQuery to help generate subscriptions along with taking over the social media accounts to use the system I built for advertising merchant products using Hootsuite. I regularly used Circle Ci for testing and Bugsnag for error reporting.

EXPERIENCE

Lead Low Voltage Technician, Symspire; Nashville, TN
Apr, 2005 - Nov, 2018

Smart Home Technologies. Setting up wired and wireless networking, full house audio, and entertainment rooms. Customer service and trouble shooting. Management and training of new employees. Organization, inventory, and maintenance of a company vehicle.
